PROFESSIONAL SUMMARY

Fresh Computer Science graduate specializing in full-stack web development, database systems, AI/ML integration, and game development. Completed an enterprise IT internship at a Japanese multinational manufacturer, contributing to a live production codebase and delivering IT support across a large-scale operational environment. Seeking a Software Engineer or Developer role to apply strong problem-solving skills and a versatile technical background within a collaborative, results-driven team.

EDUCATION

Bachelor of Computer Science (Graphics & Multimedia Technology) with Honours Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA) CGPA: 3.52	2023 - Present
Diploma in Computer Science Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA) CGPA: 3.51	2021 - 2023

KEY PROJECTS

REMA Lost Time Injury (LTI) Display Board & Management System - Developed a real-time safety display board using Vite, JavaScript, and CSS for the Safety & Health department, showing days-without-accident counter, scrolling safety announcements, and rotating incident-reference posters on office signage screens. - Designed and implemented a PHP-based management dashboard (integrated into the company's internal portal) enabling Safety & Health personnel to manage safety announcements, log incident reports, and update display posters without developer intervention - Built REST API endpoints (PHP + SQL Server) supporting CRUD operations for announcements and an append-only incident logging system, using Aura SQL Query Builder and Rakit Validator for query construction and input validation	2026
REMA PC Inventory and Compliance System Full-stack web application built with Laravel, MySQL, and Tailwind CSS to track Windows version compliance across company workstations, featuring CRUD operations, CSV import/export, dark mode, and role-based access control	2026
Edu Fairuzullah LMS - Cloud-Native Web App (AWS) Python Flask LMS prototype deployed on AWS Elastic Beanstalk with role-based access control.	2026
MY-HYGIENE - 2D Educational Game (Final Year Project) - Interactive 2D game built in Unity 2D & C# that transforms personal hygiene learning for primary school children using MediaPipe computer vision requiring real physical gestures (showing hands to wash, smiling to brush teeth) to control gameplay - Won Best Booth at FYPro-Com Exhibition, SEM 1 2025/2026	2025 - 2026
AEGIS: Escape Protocol - 3D Game (Unity 3D) Unity 3D game with AI enemies, 3 interactive maps, energy shields and custom combat mechanics written in C#.	2025
Household Energy Consumption Prediction - Machine Learning Project - Developed an end-to-end ML solution to predict household energy consumption for Smart City resource management using Random Forest Regression - Processed the UCI Appliances Energy Prediction dataset including weather and indoor sensor data (temperature, humidity) for accurate energy load forecasting - Built and deployed an interactive real-time prediction dashboard using Streamlit, allowing users to input sensor data and visualise energy forecasts. Implemented CI/CD pipeline using GitHub Actions for automated deployment	2025

WORK EXPERIENCE

Information System Intern

March 2026 – Present

ROHM Electronics (Malaysia) Sdn. Bhd.

- Developed and maintained internal corporate web applications using PHP and Microsoft SQL Server, including backend development and database integration
- Implemented REST APIs to replace hardcoded data with dynamic content, and validated API endpoints and JSON payloads using Postman.
- Configured and deployed Windows laptops and desktop PCs by installing operating systems, provisioning corporate software, applying security configurations, and joining devices to the Active Directory domain.
- Diagnosed and resolved hardware, software, and peripheral issues, providing technical support to ensure minimal disruption to daily operations.
- Assisted in configuring and troubleshooting enterprise network infrastructure, including routers and switches, to maintain reliable network connectivity.
- Performed endpoint security administration by monitoring antivirus status, reviewing threat quarantine logs, and supporting compliance with corporate security policies.

Administration Intern

March 2023 - August 2023

MZ Gold Sdn. Bhd.

- Collaborated with the Multimedia team to develop and deliver engaging digital content.
- Supported accounting workflows and assisted in digitising financial record management.

AWARDS & ACTIVITIES

- Best Booth - FYPro-Com Exhibition, SEM 1 2025/2026 (2025)
- Excellence Award Recipient, 2024/2025 Session (2025)
- AJK Promosi, UMPSA x HUAWEI AppGallery Mobile App Competition (2025)
- Club Member, Persatuan Mahasiswa Teknologi Komputer (PETAKOM) (2025)
- 2nd Place - Treasure Hunt, FK Cyber Security Week (2022)

CERTIFICATIONS

- Amazon Web Services: AWS Cloud Practitioner Essentials - Dec 2025
- Amazon Web Services: AWS Cloud Migration Factory - Dec 2025
- Cisco Networking Academy: CCNA: Introduction to Networks - Jun 2023

TECHNICAL SKILLS

- Programming Languages: PHP, JavaScript, Python, Java, C#, C, SQL
- Frameworks & Web Development: Laravel, ASP.NET, React.js, Vite, Flask, HTML5, CSS3, Tailwind CSS
- API Development: REST API, Postman
- Databases: MySQL, PostgreSQL, Microsoft SQL Server, SQLite, Firebase
- Version Control & DevOps: Git, GitHub Actions (CI/CD)
- Tools & Design: Figma, Looker Studio, Anaconda, Adobe Photoshop, Canva, Streamlit
- Game & VR Development: Unity, WebGL, Oculus SDK, Autodesk Maya
- Software Testing: User Acceptance Testing (UAT), Functional Acceptance Testing (FAT)

LANGUAGES

- Malay – Native
- English - Proficient
